## Biological Assessment: Macroinvertebrate Survey

Benthic Habitat Sampled	Habitat	Riffles	Pools	Runs	Rootwads/leafpack/woody debris	Submerged Vegetation	Undercut Banks
	Sampled? <input checked="" type="checkbox"/>						

Check all of the macroinvertebrates that you find in your stream and calculate the stream's water quality rating

### Biological Water Quality Rating:

Add up the numbers you calculated for all four categories above.

Write the total # here: \_\_\_\_\_

Circle the rating that corresponds to the total of your macroinvertebrate count.

**Good: >22**

**Fair: 17-22**

**Poor: 11-16**

**Very Poor: <11**
